Sharma M

Java Backend Developer — Spring Boot — Microservices — Kafka

+91 9791310502 | sharmamurugaiyan@gmail.com
LinkedIn | GitHub | Notice Period: Immediate

Professional Summary

- Java Backend Developer with **5+ years of experience** in developing, enhancing, and maintaining backend applications using Java, Spring Boot, and microservices architecture.
- Hands-on experience in RESTful API development, Apache Kafka-based asynchronous processing, database integration, Redis caching, and SQL query optimization.
- Experienced in implementing API security using Spring Security, OAuth2, JWT, and RBAC, with exposure to Resilience4j, Docker, Jenkins CI/CD, AWS, and Microsoft Azure.

Technical Skills

- **Programming:** Java 8/11/17, SQL, Python
- **Core Java:** OOP, Collections, HashMap, ConcurrentHashMap, equals() and hashCode(), Exception Handling, Multithreading, ExecutorService, CompletableFuture, Synchronization, Java 8 Streams, JVM Internals, Garbage Collection
- **Spring Framework:** Spring Boot, Spring MVC, Spring Cloud, Spring Data JPA, Hibernate, Dependency Injection, Auto-Configuration, Bean Lifecycle, Validation, Global Exception Handling
- **Microservices & System Design:** Distributed Systems, API Gateway, Service Discovery, Centralized Configuration, Inter-Service Communication, Scalability, High Availability, Load Balancing, Fault Tolerance, Design Patterns, Resilience4j
- **API Development:** RESTful APIs, GraphQL, OpenAPI/Swagger, API Versioning, Request Validation, Pagination, Third-Party API Integration
- **Messaging & Caching:** Apache Kafka, Producers, Consumers, Topics, Partitions, Consumer Groups, Offset Management, Asynchronous Processing, Retry Handling, Idempotent Processing, Redis
- **Security:** Spring Security, OAuth2, JWT, Role-Based Access Control (RBAC), Authentication, Authorization, API Security
- **Databases:** MySQL, PostgreSQL, SQL Server, Joins, Subqueries, Indexing, Query Execution Plans, Query Optimization, Transactions, ACID Properties, HikariCP, Connection Pooling
- **Cloud:** AWS EC2, S3, Lambda; Microsoft Azure App Service, Azure Service Bus, Azure Communication Services
- **DevOps & Tools:** Docker, Kubernetes, Jenkins, Git, Maven, CI/CD, Postman, Linux
- **Testing:** JUnit 5, Mockito, Unit Testing, Integration Testing, API Testing, Mocking, Test-Driven Development (TDD)
- **Monitoring:** Application Logging, Health Checks, Metrics, Grafana, Prometheus, Distributed Tracing, Root Cause Analysis
- **Additional Technologies:** Angular, TypeScript, JavaScript, HTML5, CSS3, Odoo ERP, Odoo Studio, Custom Module Development, Workflow Automation
- **Methodologies:** Agile, Scrum, Code Reviews, Version Control

Professional Experience

Software Engineer **Sep 2021 – Present**

Intulogic Private Limited, Chennai, India

– Develop and maintain backend services using **Java, Spring Boot, and microservices**, implementing business logic, request validation, exception handling, and database integration.

– Design, develop, and maintain **20+ RESTful APIs**, documenting endpoints with OpenAPI/Swagger to support frontend and service integrations.

– Implement **Apache Kafka** for asynchronous event processing and inter-service communication in backend workflows.

– Improved API response time by **30%** through Redis caching, SQL query optimization, and HikariCP

connection-pool tuning.

- Secure backend APIs using **Spring Security, OAuth2, JWT, and RBAC**, enforcing authentication and role-based authorization.
- Apply **Resilience4j** fault-tolerance patterns, including circuit breakers and retries, to handle service failures.
- Use Docker for containerization and support Jenkins-based build and deployment workflows in an Agile development environment.

Selected Projects

SwiftEHR – Hospital Management System **Jan 2024 – Present**

Java, Spring Boot, Spring Security, JWT, Spring Data JPA, MySQL, Angular

- Develop backend modules for patient management, appointment scheduling, and billing workflows using Java and Spring Boot.
- Build secure RESTful APIs using Spring Security, JWT authentication, and RBAC for hospital staff access.
- Integrate Twilio SMS and WhatsApp APIs to support appointment notifications and patient communication.
- Optimize database access using Spring Data JPA and SQL indexing to improve query and API performance.

ProcessWurks – SaaS Workflow Automation Platform **Jan 2023 – Dec 2023**

Java, Spring Boot, Apache Kafka, Redis, Microsoft Azure, Angular

- Develop backend functionality for a multi-tenant SaaS platform supporting document and task management for accounting firms.
- Implement Kafka-based asynchronous event processing to decouple workflow operations and support communication between services.
- Use Redis caching for frequently accessed data and integrate Azure services into cloud-based application workflows.

TCARE – Healthcare Communication Platform **Jan 2021 – Dec 2022**

Java, Spring Boot, Apache Kafka, Twilio, Azure Communication Services, MySQL

- Develop backend components for caregiver alerts and healthcare communication workflows using Java, Spring Boot, and Kafka.
- Integrate Azure Communication Services and Twilio to support automated notifications and caregiver communication.
- Build RESTful APIs for user management, role-based access control, and healthcare workflow integration.

Education

Master of Computer Applications (MCA) **2016 – 2019**

Anjalai Ammal Mahalingam Engineering College *CGPA: 7.83*

Achievements

- Received an Outstanding Performance Certificate from Intulogic Private Limited.
- Won first prize in a debugging event at AVVM Sri Pushpam College.
- Won second prize in a debugging event at AVC College of Engineering.
- Won a college basketball tournament at Anjalai Ammal Mahalingam Engineering College.
